#### PREFACE

The mandate of the Immigration Statistics Division, Immigration, is for the most part the dissemination of immigration data. Our annual publication is one of the main sources of statistics used by both government and the private sector. For this reason, we try to provide information on admissions to Canada that is of greatest interest to all parties.

In the last few years, immigration patterns have changed, reflecting the government policy of moderate, controlled growth. The issues surrounding immigration have also changed. In an effort to reflect these changes, this publication has been expanded to include several new features. Historical tables (for selected topics) from 1980 to 1986 have been incorporated in order to provide time series information. We have also added general statistics on topics of current interest such as entrepreneurs, refugees, and the foreign domestic movement.

Historical tables for the period 1978 to 1984 were introduced in the 1984 publication. Published statistics were adjusted in these tables to reflect actual activities for the years 1978 to 1983. While tables of this nature are quite useful, adjusting figures from previously published statistics could cause problems if the adjustments are only reflected on selected tables. Since the adjustments from the published to the actual figures were negligible for the years in question, it has been decided to revert to the use of published statistics tics in our historical tables.

This publication is divided into three major sections. The first contains general interest statistics on population, landed immigrants and travel between Canada and other countries, as well as information on topics of current interest.

The second and largest section deals with landed immigrants and their characteristics. Immigrants are categorized by source: Country of Birth, Country of Citizenship and Country of Last Permanent Residence (CLPR). The occupations listed in the tables are those defined by the Canadian Classification and Dictionary of Occupations (CCDO).

The last section describes the movement of people coming to Canada on a temporary basis; that is, admissions of documented visitors, foreign students and temporary foreign workers.

Definitions of most terms used in this publication may be found by referring to the Immigration Act, 1976 or the Immigration Regulations, 1978. Copies of the Act and Regulations are available in most libraries.

#### **AVANT-PROPOS**

La division Statistique d'immigration est chargée de la transmission des données de l'Immigration. Notre publication annuelle est l'une des principales sources de données utilisées par le gouvernement et le secteur privé. C'est pourquoi nous tentons de fournir les renseignements relatifs aux admissions au Canada qui présentent le plus d'intérêt pour nos lecteurs.

Au cours des dernières années, les tendances relatives à l'immigration se sont modifiées, reflétant ainsi la politique du gouvernement d'une augmentation modérée et contrôlée des niveaux d'immigration. Les questions qui s'y rattachent se sont aussi modifiées. Nous avons introduit de nouveaux éléments à la présente publication, afin de refléter ces changements. Ont été incorporés des tableaux couvrant la période de 1980 à 1986 et portant sur divers sujets d'intrêt, en vue de fournir un aperçu historique des tendances d'immigration. Nous avons également inclus des statistiques d'ordre général reflétant nos préoccupations actuelles, telles les Entrepreneurs, les Réfugiés, et le Programme Employés de maison étrangers.

La publication de 1984 comportait des tableaux historiques couvrant la période de 1978 à 1984. Pour produire ces tableaux, on avait rajusté des données tirées de statistiques déjà publiées, pour refléter les activités réelles des années 1978 à 1983. Quoique des tableaux de cette nature peuvent se révéler très utiles, rajuster des données à partir de statistiques déjà compilées peut poser un problème, si ces rajustements sont effectués seulement pour certains tableaux. Néanmoins, étant donné que l'écart entre les données réelles est négligeable pour la période visée, il a été décidé de retourner à cette méthode pour ce qui concerne nos tableaux historiques.

La publication comporte trois volets principaux. Le premier contient des statistiques d'ordre général portant sur la population, les immigrants admis, ainsi que les déplacements effectués entre le Canada et d'autres pays, de même que de l'information sur des questions à l'ordre du jour.

La deuxième section, la plus importante, traite des immigrants admis et de leurs caractéristiques. Les données sur les immigrants sont ventilées selon leur origine, c'est-àdire par pays de naissance, pays de citoyenneté et pays de dernière résidence permanente. Les professions figurant dans ces tableaux sont celles qui sont définies dans la Classification canadienne descriptive des professions (CCDP).

Enfin, la dernière section décrit le mouvement de personnes qui viennent au Canada à titre temporaire, c'està-dire des admissions de visiteurs qui doivent se voir délivrer des documents de voyage, des étudiants et travailleurs temporaires étrangers.

La définition de la plupart des termes utilisés se retrouve dans la Loi sur l'immigration de 1976 ou le Règlement afférent (1978). On peut consulter ces documents dans la plupart des bibliothèques. #### **OVERVIEW**

#### Landed Immigrants

Landed immigrants are persons who have received "lawful permission to come into Canada to establish permanent residence" (Immigration Act, 1976; Section 2). In 1986, the number of landed immigrants increased to a level of 99,219. This represents an increase of 15.0% from the previous year's level of 84,302 and an overall decrease of 30.7% from the 143,117 landings in 1980.

#### **VUE D'ENSEMBLE**

#### Immigrants admis

Les immigrants admis sont des personnes qui ont obtenu, aux termes de la loi, l'autorisation de venir au Canada en vue d'y établir une résidence permanente (Loi sur l'immigration, article 2). En 1986, le nombre d'immigrants admis a connu un augmentation pour atteindre 99,219. Il s'agit d'une augmentation de 15,0 %, comparativement à 84,302 pour l'an passé et un fléchissement global de 30,7 % au regard des 143,117 personnes admises en 1980.

Unlike previous years, the peak flow of immigrants occurred in October, November and December accounting for 30.0% of the total number of landings for the year.

Autrement que les années précédentes, la majeure partie des immigrants admis pendant l'année sont arrivés en octobre, novembre et décembre, ce qui représente une proportion de 30,0 % du nombre total d'admissions.

In 1986, the trend of the total movement differed from the pattern of 1985 making U.S.A. the major source country. India, Vietnam, Hong Kong, Poland followed in order. Pour 1986, on remarque un changement comparativement à 1985 au titre de la provenance des immigrants, ce qui signifie que les États-Unis sont devenus le pays source principal. Suivent dans l'ordre l'Inde, le Viêt-Nam, Hong Kong, la Pologne et la Grande-Bretagne.

Based on an occupation breakdown by two-digit CCDO (Canadian Classification and Dictionary of Occupations codes), the same 10 occupational groups have attracted the most landed immigrant workers since 1981. In 1986, 29.2% of all landed immigrants were destined to occupations within these 10 groups with the Service occupations accounting for the largest share at 6.2%, followed closely by Fabricating, Assembling and Repairing at 5.2% and Clerical occupations at 4.1%. These three occupational groups have had the largest share since 1983.

Si l'on se fonde sur une ventilation des immigrants au regard du code de deux chiffres de la CCDP (Classification canadienne descriptive des professions), les mêmes dix catégories de professions continuent d'attirer les immigrants qui demandent le droit d'établissement depuis 1981. En 1986, 29,2% du nombre global d'immigrants admis avaient l'intention d'occuper un emploi rentrant dans l'une de ces dix catégories; la plus forte proportion des demandes visait les professions du secteur des services avec 6,2%. Suivent de près le secteur de la fabrication, de l'assemblage et de la réparation avec 5,2% et le travail administratif avec 4,1%. Ces trois groupes constituent les professions les plus demandées par les immigrants depuis 1983.

#### Landings by Age and Sex

In spite of an increase this year in the numbers of landed immigrants, the demographic profile has remained virtually unchanged over the last eight years.

#### Immigrants admis, par âge et sexe

En dépit d'une augmentation cette année du nombre d'immigrants admis, le profil démographique n'a presque pas subi de changements au cours des huit dernières années.

(49.5%) males in 1986.

Quoique moins d'enfants ont été admis au Canada (y compris le groupe d'âge de 15 à 19 ans), ce fléchissement a été compensé par des augmentations en ce qui a trait au pourcentage d'immigrants de 25 ans ou plus. Les femmes continuent de constituer la plus forte partie de la population immigrante en 1986, avec 50,099 (50,5%) par opposition à 49,120

Although fewer children were being brought into the country (including the 15 to 19 age group), the decrease was made up for by the increases in the proportion of immigrants 25 years of age and older. Women continue to migrate to Canada in greater numbers than males: 50,099 (50.5%) versus 49,120 (49,5%) pour les hommes.
