Press Release

Ontario Workers File Legal Action Against the City of Windsor for Breach of Charter Rights.

Toronto, Ontario August 16, 2022 -A group of 20 (twenty) City of Windsor Employees have commenced legal action against the City of Windsor for breach of their constitutional rights. The group includes frontline workers and first responders previously hailed as Heroes by the City.

The employees were put on unpaid leave in November 2021, and terminations began in January 2022. The city carried out these illegal actions outside of the mandates and guidance of the Province of Ontario and without due process. The result is destruction of the lives of many of the plaintiffs who were discarded without any means of meeting their basic needs. The negative impact on their lives continues while the city maintains the illegal practice of forced vaccination to maintain employment contrary to the guidance of the Province of Ontario and international science. The tragedy and suffering of the plaintiffs is outlined in the attached statement of claim.

According to lawyer Courtney Betty, "The Canadian Charter of Rights requires that the City of Windsor abide by the division of powers set out in the Canadian Constitution and protect the basic rights of the plaintiffs guaranteed by the Charter of Rights. On both counts the City has failed"

The legal proceedings will take place in Toronto, Ontario.
