## Additional Supporters

Kids Boost Immunity relies on additional support to help purchase UNICEF vaccines earned by students. Our goal is to raise literacy about topics such as immunization, antibiotics and global health and funding from other supporters in no way influences the editorial choices around educational content posted on Kids Boost Immunity.

## In-Kind Partners and Collaborators

ThinkYoung

---

## Join Us!

Kids Boost Immunity is seeking government, foundation and corporate partners with an interest in global health, immunization, science and humanitarian education for children or innovative uses of gamification for social change. If you are an organization with an interest in any of these areas, please [contact us](#) about becoming a sponsor or partner!

## Shouldn't you just give vaccines away anyway?

Great question! As a government funded public health initiative, our mandate is not tied to UNICEF. Our mandate is to educate and inform the public about why immunization is an important part of keeping communities healthy.

Essentially, we are pledging to buy a vaccine as students educate themselves around topics covered on KBI. Think of it as a "matching" donation - we are matching a student's effort to learn with a vaccine donation to UNICEF. It's a win-win-win!

## What vaccines are donated to UNICEF?

Kids Boost Immunity directly purchases tetanus, polio or measles vaccines through UNICEF Canada exclusively.

## I want to help donate vaccines!

You can help fund Kids Boost Immunity reach more classes and vaccinate more children by [donating to UNICEF through this link](#). 100% of all funds donated through our link goes towards buying more vaccines through KBI!

**LAST MODIFIED:** [Sep 15, 2021](#)

**250,245** questions answered and **21,002** vaccines earned in support of UNICEF this school year.

**3,029,622** questions have been answered and **217,897** vaccines have been earned for children in support of UNICEF since March 2018.

(Updated every few minutes.)

**Thank you for acting locally to help immunize globally.**

You are helping people around the globe get immunity to diseases like polio, tetanus and measles that can be prevented or even eliminated through vaccination! Thank you for all the great work!
